Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Returned to compliance on 11/18/2021. OBSERVATION: T6 (New Motor Oil) and T7 (Used Motor Oil) UST s have external Audible/Visual (A/V) alarms only. When an overfill alarm is activated for one UST, additional overfill alarms for other tanks will not activate if the alarm for the first tank has not yet cleared. This effectively eliminates overfill protection for all but one tank if multiple tanks are filled at the same time. CORRECTIVE ACTION: UST systems that can only activate external alarms when the first UST overfill condition occurs, additional actions must be taken to ensure that each UST has a functional overfill prevention independent of the other UST s at the facility (i.e., installing a separate alarm unit or other appropriate overfill equipment for each tank). Currently, additional overfill alarms for other tanks will not activate if the alarm of the first tank has not yet cleared. Submit plans to correct overfill prevention equipment deficiencies to this department within 30 days. (Health and [Truncated])

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/09/2015. Failure to keep hazardous waste containers closed when not in active use (CCR 66265.173(a)) Two of the 55 gallon drums of used oil filters were overfilled over the top of the drum, therefore a lid could not be placed on the drum. Maintain the containers to have enough as to not run out of room for storage of used oil filters. Also keep enough space in the drum to allow a lid to be kept on the drum at all times unless it is being filled or emptied.

minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes:

Returned to compliance on 11/18/2021. OBSERVATION: T6 (New Motor Oil) and T7 (Used Motor Oil) UST s have external Audible/Visual (A/V) alarms only. When an overfill alarm is activated for one UST, additional overfill alarms for other tanks will not activate if the alarm for the first tank has not yet cleared. This effectively eliminates overfill protection for all but one tank if multiple tanks are filled at the same time. CORRECTIVE ACTION: UST systems that can only activate external alarms when the first UST overfill condition occurs, additional actions must be taken to ensure that each UST has a functional overfill prevention independent of the other UST s at the facility (i.e., installing a separate alarm unit or other appropriate overfill equipment for each tank). Currently, additional overfill alarms for other tanks will not activate if the alarm of the first tank has not yet cleared. Submit plans to correct overfill prevention equipment deficiencies to this department within 30 days. (Health and [Truncated])

Completed Document Type: Site Screening
Completed Date: 01/31/1991
Comments: SSI Report was reviewed by Region 4 staff. The SSI did not take any
samples to verify whether or not battery acid or lead remains on
site. The area has been regraded with no evidence of where the
unlined ponds had been. There is a fence around the property.
Groundwater is at 340 feet be- low ground surface and there is a
semi-permeable clay layer from 246 feet to 320 feet. Staff recommends
that a medium priority PEA be performed by the state to find out if

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 08/31/2020. OBSERVATION: Fuel Alarms that occurred were associated with bi-annual voluntary self-audit of 2/3/2020. These alarms were logged on a bi-annual test form but not on the Designated Operator Monthly Report CORRECTIVE ACTION: Log all fuel alarms and associated response on the Designated Operator Monthly Report, including the bi-annual self-audit. Violation Notes: Returned to compliance on 09/28/2021. OBSERVATION: The facility is no longer operating the shop on the North side of the airport and has moved into a building on the South side of the airport. The mailing address and operations are still based out of Terminal 2 on the North side. As the shop itself has moved, the site map submitted in CERS is no longer valid and a new map shall be prepared and submitted into CERS. The emergency response plan document shall also be revised accordingly to account for any changes with the move. Also, hazardous materials were observed on site during the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. CORRECTIVE ACTION: Submit a signed statement that the Business Plan elements have been updated and resubmitted into CERS.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: SW - Effluent
Violation Notes: The rain event on December 11th through the 12th 2014 could have been sampled. Section B.8.b. of Order 97-003-DWQ provides an opportunity for the facility to collect a water sample outside the first hour of discharge after a rain event. This would have allowed the facility to collect at least one sample for the year. In the future we would expect you to collect a sample under similar circumstances.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facility SWPPP at the site was dated 2012. The SWPPP on-line was updated on 2/25/15. The 2014-15 Annual Report was just mailed to the Regional Board. The site has limited outside exposure. There was material staging outside the back doors but this was stated to not occur during days with forecasted rain events. Hazmat area covered with secondary containment. The site representative has some confusion regarding timing of collecting samples. Business hours are 06:30 - 22:30. On December 11, 2014 rain started at 11:00 pm and continued through 10 pm Friday December 12th. A stormwater sample could have been collected first thing Friday December 12th to get at least one storm water sample for the season. Section B.8.b. of Order 97-003-DWQ provides an opportunity for the facility to collect a water sample outside the first hour of discharge after a rain event. Staff told Justin I would send him the language of the permit providing clarification for him. Under the new permit Attachment H, Section XI.B.5. of Order 2014-0057-DWQ requires samples from each discharge location to be collected within four (4) hours of: "a. The start of the discharge; or, b. The start of facility operations if the Qualified Storm Event (QSE) occurs within the previous 12-hour period (e.g., for storms with discharges that begin during the night for facilities with day-time operating hours). Sample collection is required during scheduled facility operating hours and when sampling conditions are safe "

Eval Notes: Site had area where plating occurs contained by an asphalt berm. A grate over the containment has visible liquid being contained under the grating. There are a number of plating tanks and waste storage containers within the bermed area. The bermed area is indicated on the site map in the SWPPPP as a yellow line around the tanks. There is one discharge monitoring point.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Notes: if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Returned to compliance on 02/01/2021. OBSERVATION: It was found that the 180 day accumulation time limit for the 275 gallon tote of waste diesel fuel and the empty tote used for waste oil has been exceeded. CORRECTIVE ACTION: Have a licensed hazardous waste hauler remove the waste oil tote and the diesel fuel tote within 30 days and submit a copy of the hazardous waste manifest as proof of proper disposal.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/01/2021. OBSERVATION: A partial CERS business plan was submitted on January 5, 2021. It was found that the plan is missing the hazardous materials and waste inventory. The site map and emergency response plan were also found to have been uploaded into the locally required documents of the facility section.
CORRECTIVE ACTION: Please submit an update to your CERS account to include the hazardous materials inventory, map and emergency response plan in the designated sections. If you need assistance with CERS please contact our CERS helpline at 909.386.8432.
